

Product	Description	Application
ZOLDINETM XL-29SE	ZOLDINE™ XL 29SE is a clear amber liquid multifunctional carbodiimide supplied as 50% active in propylene glycol monomethyl ether acetate.	ZOLDINETM XL-29SE is a liquid multifunctional proprietary carbodiimide polymer used as crosslinker for carboxylated polymers typically applied for water-borne metal, plastics, and wood coatings, water-borne leather finishes, and water-borne inks.
ZOLDINETM ZE	ZOLDINE™ ZE is a low viscous liquid oxazolidine that is soluble in water, ethanol, acetone, and naphthenic oils.	ZOLDINETM ZE is a liquid proprietary oxazolidine used as fast-reacting crosslinking agent for collagen and casein, as well as vegetable tanning materials in many leather production processes, including pre-tanning, tanning, re-tanning and finishing.
