

Activated carbon in powder or granular form

Under the brand name "Silcarbon" we supply steam-activated carbons in powder or granular form that can be used for applications such as removing unwanted colorants in beer.

We also supply special carbons for water treatment and for the removal of flavour from spring waters.

Description	Application
Silcarbon CW 20, steam-activated carbon powder	Decolorization, deodourization and purification of beverages such as beer, wine, fruit juices
Silcarbon K 814, steam-activated carbon granules	Drinking water treatment, removal of halogenated hydrocarbons, pesticides, herbicides
