

| Product | Chem. Description | Features and Benefits |
|----------------------|--------------------------|--|
| TYZOR® BTP | n-Butylpolytitanate | Can act as inorganic binder alone or in combination with other metal oxide for mineral filled systems providing high temperature resistance. Low VOC content. |
| TYZOR® TnBT | Tetra-n-Butyltitanate | Very useful binder and adhesion promoter or cross-linker for OH-functional polymers, 100% active. Miscible in most organic solvents. |
| TYZOR® AA-105 | Titanium Acetylacetonate | Excellent as crosslinking agent for OH- functional polymers or binders, to promote adhesion or act as binder itself. Miscible in most organic solvents. Solvent free, 100% active. |
