

Product	Chem. Description	Features and Benefits
LUVODUR® PAO (low visc.)	Poly-Alpha-Olefin	API Gr. IV base oil with superior thermal and oxidative stability. High VI. Very good low temperature properties allows a wide range of applications. Low volatility (Noack) for the formulation of energy efficient lubricants with low friction behaviour. V100: 2 / 4 / 6 / 8 mm ² /s.
LUVODUR® PAO (high visc.)	Poly-Alpha-Olefin	API Gr. IV base oil with superior thermal and oxidative stability. High VI. Very good low temperature properties allows a wide range of applications. Low volatility (Noack) for the formulation of energy efficient lubricants with low friction behaviour. V100: 40 and 100 mm ² /s, more grades on request.
