MnCl₂ (water-free)
MnCl₂.2 H₂O (dihydrate)
MnCl₂.4 H₂O (tetrahydrate)
Manganese dichloride

Manganese chloride is a white to light purple or pink inorganic manganese salt of hydrochloric acid. Manganese chloride is obtained by bringing about a chemical reaction. Manganese chloride is an odorless solid which is easily soluble in water.

Manganese chloride is used, amongst other things, as manganese source in the areas of foods, food supplements and pharmaceuticals.
