MICROSPONGE® N Delivery System	Cellulose (plus active)	The proven technology of the original Microsponge® delivery system is now available with natural microparticles. This All-Natural delivery system is the scientific answer to deliver on these consumer expectations. Active ingredients are isolated deep within the core of the Microsponge® N matrix. Through a combination of friction and diffusion, the actives are steadily released from the matrix.	Amcol HBS	
MICROSPONGE® Delivery System		Microsponge® technology is a multi-functional delivery system designed to improve the stability and reduce the irritation of cosmetic and pharmaceutical actives in topical formulations. Microsponge is a recognized brand in the pharmaceutical industry that is now available for cosmetic applications. Microsponge products are free-flowing powders that can be readily dispersed in gels, emulsions, and powders.	Amcol HBS
