Premium Quality and Performance

Excellence in every detail throughout all products and services - this is what Lehmann&Voss&Co and the PHARMAGNESIA® brand stand for. In cooperation with long-term production partners, products are created that are developed according to our requirements and customer wishes. Thereby, our goal is always to achieve an excellent combination of innovation, quality, price and performance. This is what you can expect from us:

Customized solutions

You have the requirements, we develop the right solution: From individual products to individual product features.

Know-how and flexibility

We make combined deliveries with other minerals possible.

Holistic competence

We are not only your partner for valuable raw materials, but also offer technical support for successful production.

Reliability without compromise

We know our partners personally, ensuring the highest standards - from extraction and production to on-time delivery of every order quantity.

Proven expertise

Since 1894, we are a successful partner for high-performance chemical and mineral specialties. We combine knowledge with experience and the passion for continuous innovation.
